

Dhaka Integrity Dialogue-2: Climate Finance and Governance in South Asia

18-19 September, 2017, Dhaka

Organized by Transparency International Bangladesh (TIB)

Speaker's Profile

Aislin Baker took on the role of Senior Governance Adviser and Team Leader in DFID Bangladesh in June 2017. She previously worked with the UK's Department for International Development in London, Afghanistan, Pakistan and Sudan where she has covered issues ranging from political accountability, to public sector reform, corruption, justice and conflict.

A.K. Enamul Haque, PhD, is faculty member of the department of economics at the East West University in Dhaka, Bangladesh. He completed his doctoral degree from the University of Guelph, Ontario, Canada in Natural Resource Economics. Dr. Haque has significant contribution in the climate change adaptation, environmental valuation, wetland and other natural resource economics. He has valuable contribution to the Climate Public Income Expenditure Review for Bangladesh that was carried out under the Ministry of Finance. Moreover, he also worked for the Planning Commission of Bangladesh for mainstreaming climate change into national plan documents. Besides, he is one the editor as well as contributor for the Environmental valuation in South Asia published by Cambridge University Press. Professor Haque has been a SANDEE research advisor for many years. He is also serving as Director of Asian Center for Development, Director for Economic Research Group and Member, BDIX Trustee Board.

Atiq Rahman, PhD, is the Executive Director of Bangladesh Centre for Advanced Studies and in-charge of Programme and Policies of BCAS. He also coordinates Global Forum on Environment and Poverty (GFEP), which is an initiative emerging out of UNCED in Rio, and a worldwide network of over 400 policy and research institutes working on sustainable development, global governance and equity issues. Further Dr. Rahman is the Chairman of the Executive Board of Climate Action Network – South Asia (CANSA), a South Asian Network working on Global Change, working closely on global change issues and global networks. In 1999, he was elected as the Chairperson of the Coalition of Environmental NGOs, Bangladesh and continues to represent this vibrant community as its principal mover and shaker. He was the Team Leader of the National Adaptation Plan of Action (NAPA) Synthesis, Government of Bangladesh. Dr. Rahman is a leading Environment and Development Specialist with wide national, international and global experience and involvement in Sustainable Development, Environment and Resource Management, poverty and equity, disaster management, people's participation, global governance and modeling evaluation issues. He is a well recognized global leader in sustainable development. He was the lead author of the IPCC Fourth Assessment Report, which received Nobel Peace Prize in 2007. He was a recipient of this Nobel Peace Prize with other scientists. He was awarded the UN Highest Award for Environment "Champions of the Earth 2008". This award recognizes "the extraordinary leadership and his contribution to environmental issues, sustainable development and climate change. He has also received "Environment Padak -2008" for research and technology innovation by the Government of Bangladesh, the highest official recognition for outstanding contribution in the field of environment. He has been teaching at Fletcher School of Law and Diplomacy, Tufts University, Boston, USA as the Visiting Professor of International Diplomacy and Sustainable Development. He is also the Bangladesh Focal point of South Asian Poverty Commission follow up actions. Trained as a chemist having education in B.Sc Hons. and M.Sc from Dhaka University, he was awarded the Commonwealth Scholarship 1974 and completed his Ph.D on solid state chemistry and low energy processes from Brunel University, London, UK. in 1977. For fourteen years (1974 - 1988) he taught and researched in the Oxford and Aberdeen universities in the UK and the Haute Alsace in France.

Fazle Rabbi Sadeque Ahmed holds PhD in Environmental Science from the University of Aberdeen, UK in the year 2005. He has been worked as Project Coordinator, Community Climate Change Project of PKSf, under Bangladesh Climate Change Resilience Fund since 2012. Prior to that he had worked as Director (Climate Change and International Convention) in the Department of Environment from 2009 to 2011. He was a member of Bangladesh delegations in several international climate change negotiation including COP 15 in Copenhagen and COP 21 in France. He has also been working as

an adviser of Green climate fund board for the last the two years. He has several papers, book chapters, briefing papers, and key note key-note speaker his credit. He is also an Adjunct faculty of several training institutes. As a member of technical committee, he had contributed to several national documents such as NAPA, INDC, Climate Fiscal Framework etc.

Firdaus Ara Hussain is a development expert working in various capacities for over 10 years and is currently engaged as Principal Advisor-Climate Finance Governance Project of the Climate Finance Governance Project and Implementing Advisor of the CF Ready Programme in GIZ Bangladesh. In this position, Ms. Hussain is providing advisory services to the Bangladesh Ministry of Environment and Forests in public financial management, adaptation and mitigation efforts, policy coordination and capacity development. For the Global CF Ready Programme, she is advising the Secretariat of the National Designated Authority to the Green Climate Fund in the Economic Relations Division (ERD) to the Green Climate Fund in its organizational and capacity development. Prior to this, she worked with the GIZ Office Dhaka as Deputy Director -Portfolio Management where she advised on the financial management, monitoring and evaluation, project development and strategic coordination of all projects under the GIZ BD portfolio. Ms. Hussain specializes in climate change, climate finance, rural and regional development, project management, project financial management, project development, research, monitoring and evaluation, among others. She currently is pursuing her PhD in Asian Institute of Technology (AIT), Thailand in the area of Climate Finance. She is studying how the affected communities are engaging in adaptation measures in rural Bangladesh particularly which adaptation responses should be focused on in affected households in Bangladesh.

Gawher Nayeem Wahra has over 28 years of experience, managing complex emergencies and natural disasters at local, regional, national and international levels. He has played managerial roles in developing community-focused humanitarian response and human rights-based resources for right-based humanitarian actions, monitoring and coordinating in various development organisations. In the early 1990s, Mr Wahra was actively involved in developing the country's first national disaster management training manual. He has worked on disaster risk reduction and climate change adaptation programmes, with focus on child protection in emergencies in various humanitarian organisations such as Oxfam, CARE, ActionAid, Save the Children, PLAN, Swiss Development Cooperation and UNICEF. He has worked in Kurdistan (northern Iraq), India, Myanmar, Nepal, Pakistan and Somalia, with specific assignment on disaster risk reduction and humanitarian response. Mr Wahra is an adjunct faculty at the Institute of Disaster Management and Vulnerability Studies, University of Dhaka. He assisted in developing the undergraduate and postgraduate curricula for disaster management courses at public universities.

Gulam Mohiuddin has been working in Climate Change domain for last seven years. He is currently working as a Programme Manager (Research & Policy) at Climate Finance Governance Unit in Transparency International Bangladesh (TIB). He has keen interest on climate change adaptation finance governance. His published researches are on governance status on Local Government Institutions and Bangladesh Water Development Board implemented climate projects (<https://goo.gl/dPoGXX>, <https://goo.gl/rKNcfq>). He has grass-root level experience in climate change adaptation project planning and implementation. He was involved with implementation of climate funds like Fast Start Financing and Bangladesh Climate Change Resilience Fund (BCCRF). He has completed his MSc and BSc in Geography and Environment from Jahangirnagar University with a special focus on Climate Change and Political Ecology.

Ian Stuart Tellam has 20 years experience as director, consultant, researcher, and fundraiser for many sustainability initiatives. He is the former director of the Dutch government's technical and financial support to developing countries for climate change. And is now: director of the independent consultancy bureau Adaptify; research associate with Stockholm Environment Institute; and coordinator of AdaptationWatch, which is a partnership of 14 universities, think-tanks and NGOs from all over the world, aiming to increase transparency and participation in climate adaptation. Ian holds a science degree from Middlesex University, UK, was a course leader for the UK Open University's International Environmental Policy programme, and has been a lecturer for the University of Amsterdam's International Development Studies Programme.

Iftekhazaman, PhD, is Executive Director of Transparency International Bangladesh (TIB). He served earlier as Executive Director of Bangladesh Freedom Foundation (1999-2004), Executive Director of Regional Centre for Strategic Studies, Colombo (1995-99) and Research Director of Bangladesh Institute of International and Strategic Studies (1982-95). He was educated in the University of Dhaka and Academies of Economics, Wroclaw and Warsaw. He was a post-doctoral fellow in International Relations Department of University of Tokyo (1988-89). Dr. Zaman was elected to the International Board of Directors of TI in 2008, re-elected in 2012 and for the third term in 2015. He is the Chairperson of Acid Survivors Foundation; Trustee of Bangladesh Freedom Foundation, Manusher Jonno Foundation and Bishwa Shahityo Kendro; and Member, International Commission on Chittagong Hill Tracts. He was the first individual from the developing South to be elected as Chair of the International Committee of the Washington DC-based Council on Foundations. Main areas

of his current interest and expertise are governance, anti-corruption, people's engagement, social accountability, politics, development, regional security and cooperation, on which he has written and published widely in and outside Bangladesh. In recognition of his leadership in advocating against corruption and promoting transparency and good governance, Dr Zaman was awarded the first Global Partnership Forum for Social Accountability (GPSA) Award in May 2015. The award acknowledged his role to catalyze institutional, legal and policy reforms and application of participatory social accountability engaging volunteers, particularly youth, in such vital sectors as education, health and local government.

Kazi Maruful Islam, PhD, is serving as a Professor of Department of Development Studies, University of Dhaka. He has served as the team leader of 'Climate Change, Food Security and Governance Unit' of Eminence. He has been engaged in the academia and development practices for quite many years as a development professional with experience in disaster and governance, climate change policy, local governance, gender mainstreaming program design and evaluation and application of ICTs in local government service delivery in particular; advocacy training and capacity building of civil service and NGOs, and governance of primary Health Care. Dr. Islam obtained Doctor of Philosophy in Political Science from University of Heidelberg and Masters of Philosophy in Public Administration from University of Bergen, Norway. He has extensive works on political economy of public and private sector initiatives and strategies for disaster risk reduction in Bangladesh. This unique blend of academic and research-based knowledge and experience has made Dr. Islam as one of the leaders in these sectors and the most effective one for leading such a dynamic team.

Kevork Baboyan started his career supporting the Ministry of Finance in Beirut, Lebanon in macroeconomics policy and public debt management. He then moved to Papua New Guinea as an Overseas Development Institute fellow where he worked on the taxation of mining and oil companies and trade policy with the Internal Revenue Commission in charge of Taxation and Customs. Back in Lebanon, he worked in the Office of the Minister at the Ministry of Finance on reforming the national budget process in close collaboration with the World Bank EFMIS project before joining the Ministry of Finance in Kuwait to build the capacity of its fiscal policy unit under a program with the International Monetary Fund. Since 2013, Kevork he has been working with the UNDP Bangkok Regional Hub to support countries in their efforts to make their planning and budgeting systems more responsive to climate change and strengthen accountability on what they are doing to implement and finance their national climate change action plans. He holds a Bachelors of Arts in Economics and History from the American University of Beirut and Master of Arts in Development Economics from the University of Sussex at Brighton and Hove.

Mani Nepal, PhD, is Senior Environmental Economist and Research Program Manager at SANDEE, ICIMOD. He conducts and co-ordinates SANDEE research and training activities, and provides technical support and mentoring to the SANDEE researchers. He is a technical editor of SANDEE Working Paper series. His research interest is in non-market valuation, household energy, climate change, program evaluation, and development issues such as child labor, poverty/inequality, armed conflict and its effect on social welfare. Earlier, he worked as Associate Professor at Tribhuvan University, visiting faculty at the University of New Mexico, USA, and Kathmandu University, Nepal; Senior Economist at the Department of Finance and Administration, Santa Fe, New Mexico; and Economist at NEFAS and APROSC, Kathmandu. He has a MS degree in Policy Economics from the University of Illinois at Urbana-Champaign and Ph.D. in Economics from the University of New Mexico, USA

Megan Darby is deputy editor at Climate Home, the go-to site for international climate change news, where she writes, commissions and edits stories. From the fragile coral reefs of the Maldives to the opencast coalmines of Germany, her reporting explores the real-world consequences of policy and business decisions. After covering three United Nations climate summits, Darby knows most of the acronyms—and does her best to spare the reader from them. Prior to joining Climate Home in 2014, she covered water and energy for industry magazine Utility Week.

Mizan R. Khan has a Ph.D in Environmental Policy and Management from the University of Maryland School of Public Policy, MD, USA. He is Director of External Affairs at North South University (NSU), and, a Professor at the Department of Environmental Science and Management (DESM), NSU, Dhaka, Bangladesh. M. Shamsul Alam, is serving as the Dean of Faculty of Engineering at Daffodil International University. He has a PhD in Electrical and Electronic Engineering. He has professional experience of 35 years in Energy and Power sector. He has expertise on Climate Change Mitigation with special focus on Renewable Energy.

M. Zakir Hossain Khan has been working as a Senior Program Manager on Climate Finance Governance under Transparency International Bangladesh since 2010 through generating evidences to promote good governance in climate finance at both country and global level (UNDP, IISD, DFID). He led as well as contributed to conduct several studies on climate finance governance that have created effective demand for good governance in climate finance at both national and international level. He has solid experiences to carry out studies on environmental economics, tax policy and system, power sector, climate change adaptation and disaster and water resource managements. Some of his studies have been published by Oxford University Press, Cambridge University Press, Journal of Development Economics, Transparency International Bangladesh, South Asian Network for Development and Environmental Economics (SANDEE), South Asian Network for Environmental Economics (SANEI). Zakir did his MS in economics from North South University in 2005 with the specialization in environmental economics.

Saleemul Huq, PhD, is the founding Director of International Center for Climate Change and Development (ICCCAD) at the Independent University, Bangladesh and also a Senior Fellow of the International Institute for Environment & Development (IIED), UK. Before joining IIED, he was director of the Bangladesh Center for Advanced Studies. Dr. Huq has been involved in the work of the Intergovernmental Panel on Climate Change, serving as a Lead Author and Coordinating Lead Author in the Working Group II, which focused on impacts, vulnerability and adaptation. He has published reports and articles on climate change, particularly on adaptation to climate change. He is the lead author of the chapter on Adaptation and Sustainable Development in the third assessment report of the Intergovernmental Panel on Climate Change (IPCC).

Sandeep Roy is a co-founder at VNV Advisory Services, responsible for the initiation and development of the climate change expertise. His strong belief in community outreach and sustainable initiatives, spearheaded VNV's ownership on low carbon social development projects such as rural energy access, clean cooking, agro-forestry, social forestry, water access and sustainable agriculture. His work encompasses over 2.5 million rural households across the South Asia region and over 40 NGOs and implementation partners. He has been in carbon markets since the inception and has dealt with over 80 emission reduction projects across carbon mechanisms and standards. He plays an advisory role to over 100 companies and countless non - profits for climate finance related affairs. Sandeep has over 15 years of industry experience in various fields, with 6 years dedicated to the consulting business. His innovation in the field of Climate finance and its relation to corporate sustainability has been widely recognized and enabled him to work in areas of financing and ensuring additional funding for the deployment and maintenance of sustainable and clean energy projects. He is a certified auditor for various sustainability standards such as the forest stewardship council and he is also a certified CII sustainability assessor. He is part of various global forums and committees on sustainability and low carbon related issues and has co- authored various articles and publications on the same.

Santosh Kumar Patnaik is the programme coordinator of Climate Action Network South Asia. He currently manages projects on advocacy of low carbon development, effective ways of climate communication and policy formulation to enhance climate resilience. He is also involved in research and analysis on various themes such as climate finance, sustainable consumption and production and sustainable transport. He also works towards maintaining partnership with government representatives at sub national level, civil society and media. He studied for his Masters in Environmental and Energy Management from University of Twente, The Netherlands. He is also an alumnus of Forest Research Institute University, India.

Shaziya Ali has been working in the civil society sector in the Maldives for the past 8 years. She is currently working at Transparency Maldives as a Senior Project Coordinator on their Climate Integrity Project. Shaziya is actively engaged with the Maldivian communities on community development and believes that grassroots advocacy and action are crucial to strengthening mechanisms for increasing transparency and accountability of public officials and better public policies. Her past experience includes working in Maldives Red Crescent as a national Disaster Response Coordinator. Shaziya holds a BA in Political Science and an MA in International Relations.

Sumaiya Khair, PhD, is a Professor at the Department of Law, University of Dhaka, Bangladesh where she served as Head of the Department of Law from 2009-2011. She took leave from the University to serve Transparency International Bangladesh (TIB) as Deputy Executive Director from July 2013- June 2017. She has rejoined the University in July 2017 but continues to serve TIB as Adviser, Executive Management. In addition to advising and guiding TIB's research and advocacy, she oversees its Climate Finance work. Professor Khair has a Ph.D. from UK where she has also studied as a Commonwealth Post-Doctoral Academic Fellow. She sits on the editorial board of the "The Asian Yearbook of International Law". Professor Khair writes on law, justice and human rights and governance and has to her credit a number of articles and publications in both national and international journals and books. Her areas of interest and research include human rights, humanitarian law, child rights, legal empowerment, refugee & migration, governance, labour standards and gender issues. She serves as a resource person in her areas of expertise in national, regional and international forum. Professor Khair has consulted for UN agencies, ILO and international development partners in the areas of her expertise. She was Head of Research and Policy Influence from 2012 to 2013 in a DFID-funded programme on Community Legal Services implemented by Maxwell Stamp PLC. Professor Khair sits on governing boards of a number of research and development organisations., namely, the Foundation for the Development of International Law in Asia (DILA), Refugee and Migratory Movements Research Unit (RMMRU), Bangladesh, Bangladesh Environmental Lawyers' Association (BELA), and Rangpur-Dinajpur Rural Services (RDRS).
